Standard Range:	up to 35 miles
Batteries Supplied:	75-90 Amps
Deck Clearance:	4.5-5.5"/11-14cm
Maximum Load:	25 stone/160 kgs

Since 2003, Scootertech Limited have manufactured premium mobility scooters for the UK and EU markets. All our mobility scooters use industry renowned Twin Motor Technology, offering the ultimate in robust and reliable performance. Expertly engineered, the ATLAS conforms to the very latest and most rigorous medical device safety testing standards to date. Scootertech were one of the first manufacturers to supply vehicles with an additional emergency braking system, now a legal requirement for all new models of mobility scooters within the EU. The ATLAS also allows for gradients higher than many other scooters, at 15° (degrees), customers can rely on their vehicle coping uphill without loss of performance.

All our vehicles have ABS colour-through plastics which won't chip or peel and are easy to maintain, and the control panels are responsive and easy to use. The ATLAS benefits from the latest elastomer suspension, and automatic speed sensor for safer cornering, ensuring a safe and comfortable ride. Upgrade Packages are also available, including **Manufacturer Deal** which provides a full 2 Year Warranty and includes 1 Year FREE Insurance & Breakdown Cover for peace of mind, and **Lithium Ion Power** conversion to go the extra distance.

The ATLAS has a stylish, modern design with many useful features - delta handlebars, wing mirrors with integral indicators, highly visible headlight & rear lighting systems. The ATLAS also provides comfortable seating, plenty of legroom and quality carpets and fittings, the standard for all our vehicles.

The ATLAS offers additional extras to compliment your lifestyle - front baskets & holders, rear trolley baskets, crutch holders, for example.

This rougher terrain mobility scooter is built to the highest standards for both safety and longevity, providing reliable transportation for years to come for your **LIFE Without Limits**.
